# Reversal of LinkedList

```java
static void reversePrint(SinglyLinkedListNode head) {

        SinglyLinkedListNode node,next,prev;
        prev=null;
        next=null;

        while(head!=null){
            next=head.next;
            head.next=prev;
            prev=head;
            head=next;
        }
        while(prev!=null){
            System.out.println(prev.data);
```

```
            prev=prev.next;
        }
    }
```
